PREFACE

The number of Ms copies of medieval musical treatises still extant is very large; a few of these works, to judge from the numerous ways in which they were studied, copied and utilized by later writers, seem to have been of commanding interest. The following list cites these works in the order of the frequency of existing copies.

1. The works of Guido of Arezzo;
2. *Dialogus* attributed to Oddo of Cluny;
3. *Enchiriadis cum scoliis*;
4. *Prologus in tonario* of Berno of Reichenau;
5. The musical theory of John of Affligem (Cotto).

The editor is engaged in preparing editions of these works provided with a critical apparatus; some others that call for a fresh edition or have not been published at all, will be similarly treated.

The main reason for giving precedence to John's treatise lies in the fact that in the one edition ever published (GS II, 230 ff) only 23 of the 27 chapters are printed, so that John's *tonarius* is still hidden away in its Ms state. Moreover, for Gerbert's edition only three manuscripts were used: „Ex Ms San. Blas. saec. XII collato cum Vindoboniensi et Lipsiensi". The first has been lost in a fire, as have most of the Sankt Blasien Mss; the other two (Leipzig, Univ. Library 79 and Vienna Nat. Bibl. 51) have been preserved. But besides these two there are in the libraries of Europe some ten other Mss containing John's treatise. All of these, together with those of Leipzig and Vienna, have been utilized for the present edition.

I wish to express my thanks to the various librarians for their never failing kindness and assistance, and to J. Bank, C. Maas and P. Visser for giving me the benefit of their highly valued collaboration.

§ 1. THE MANUSCRIPTS

John's treatise on the theory of music has been transmitted in part or in full in the following manuscripts, on which the present edition is based.

Ba Basle, Univ. Libr. F. IX. 36, partim 12th cent., partim (fol. 76-157) 14th cent.; cod. membr. in 8°, 157 fol. (cf. J. - c. Can John have been an (Italian?) pope, from the qualification of himself as *servus servorum Dei*²⁹?

It is hardly necessary to point out that these words are no more than a forced expression of deference quite in keeping with the extravagant eulogy of Fulgentius in the rest of the letter. They have nothing to do with what became the usual subscription of papal documents, especially in later times.

- d. Can he have been a native of Lorraine or Flanders, since he calls himself a pupil of Fulgentius of Affligem?

In the foregoing it was made highly probable that John was a pupil of the abbot Fulgentius and that he was not an Englishman. The conclusion that he was, therefore, a Lorrainer (from the connection of Affligem abbey with the monasteries of Lorraine) or a Fleming, is plausible but cannot be proved (see below). In any case a question of greater importance is: When and where was the treatise composed? We shall now turn to this question.

Nothing is known of the date of John's birth. On the assumption that he got his training from Fulgentius, abbot of Affligem (1089-1121), and that he dedicated his treatise to his master, this date must be placed in the last decades of the 11th century and the treatise must have been composed between 1100 and 1121.

The contents of the letter to Fulgentius also show that at the time of writing he was no longer an inmate of the abbey at Affligem. If it should be objected that the letter is addressed „Domino et patri

QUALITER QUIS AD MUSICAЕ DISCIPLINAM SE APTARE DEBEAT

¹ **P**rimum hoc illi, qui se ad musicae disciplinam aptare desiderat, iniungimus, ut litteras monochordi cum syllabis suprascriptis firmare studeat, nec antequam eas memoriter teneat, ab hoc opere desistat. ² Sed de litteris nunc dicere differimus, ut post hoc commodius atque uberiorius de eis tractemus. Nunc autem de syllabis aliquid dicamus. Sex sunt syllabae, quas ad opus musicae assumimus, diversae quidem apud diversos. ³ Verum Angli, Francigenae, Alemanni utuntur his: ut, re, mi, fa, sol, la. Itali autem alias habent, quas qui nosse desiderant, stipulentur ab ipsis. ⁴ Eas vero, quibus nos utimur syllabus, ex hymno illo sumptas aiunt, cuius principium est:

DE MODIS, QUOS ABUSIVE TONOS APPELLAMUS

¹ **S**ciendum quoque, quod modi, quos uti Guido asserit, abusive tonos appellamus, octo sunt, ad imitationem videlicet octo partium orationis. ² Congruum quippe videtur, ut sicut octo partibus continetur omne quod dicitur, sic octo modis moderetur omne quod canitur. ³ Sed cum nunc octo sint, quondam dumtaxat quattuor erant, ad similitudinem fortasse quattuor temporum. ⁴ Sicut enim saecula variantur quattuor temporibus, sic quattuor modis distinguitur omnis cantus. ⁵ Et hos quattuor modos Psalmista notare videtur, ubi dicit:
